Final-year Computer Science Engineering student with strong foundations in data structures and problem-solving skills. Experienced in full-stack web development, Android application development and data analysis through academic projects and internship exposure. Proficient in Java and JavaScript with hands on project experience.

Education

- Bachelor of Technology in Computer Science & Engineering [2022 – 2026]
CGPA: 9.01
CMR UNIVERSITY, Bengaluru
- Pre University education (PCMB) [2020 – 2022]
Percentage: 93.5
Prathibha pre university college

Internship

- **MERN Stack Developer Intern - ORVIONAR** [Jan 2026 – April 26]
 - Contributing to full-stack development using MERN stack to build scalable web applications.
 - Designed responsive user interfaces and connected them with backend APIs to ensure secure and seamless functionality.

Projects

EcoChatbot – AI Conversational Agent [Apr – Jun, 24]

- Developed an AI-based chatbot using Python, NTLK & TensorFlow to classify user queries using NLP.
- Designed an intent-based conversation system trained on structured datasets to generate automated responses.
- Built an interactive Tkinter GUI interface enabling real-time user interaction with trained chatbot model.

Bengaluru Traffic Data Analysis [Mar – May 25]

- Applied Fuzzy C-Means clustering to analyse traffic congestion patterns and derive structured insights.
- Presented analytical results using Python-based visualizations to improve clarity and usability.

Agri-Finance Assistant – AI based crop advisory & financial planning system [Aug – Oct 25]

- Tools Used: Java, Python, Android Studio, Firebase Authentication & Firestore, Google Collab.
- Built an intelligent advisory system integrating machine learning, financial analytics for crop decision support.
- Implemented a Random Forest Regression model trained on ~ 10,000 agronomic records to predict crop yield.
- Designed a hybrid pipeline combining rule-based agronomic filtering, real time market price integration and ROI – based crop ranking.

DFruitIndia – Business Web Application [Jan – Feb 26]

- Developed a full-stack e-commerce web application using MongoDB, Express.js, React.js and Node.js.
- Structured dedicated user and admin dashboards for product management, order tracking & inventory control.
- Integrated RESTful APIs for authentication and transaction handling with secure MongoDB data storage.

Technical Skills

- Programming Languages: Java, JavaScript, Python
- Core Concepts: Data Structures, OOP, DBMS
- Web Technologies: Node.js, React.js, Express.js
- Databases: MySQL, MongoDB, PostgreSQL
- Tools: Git, GitHub, Postman, VSCode, Android Studio, Firebase
